INDEX TO VOLUME 44

Aliprantis, C. D. and Langford, Eric. *Almost σ-Dedekind complete Riesz spaces and the Main Inclusion Theorem*, 421.

Bajpai, P. L. and Singh, Prem. *The radius of starlikeness of certain analytic functions*, 395.

Bajpai, S. K. *On regions of α-convexity for starlike functions*, 365.

Bentley, H. L. and Naimpally, S. A. *$\mathcal{L}$-realcompactifications as epireflections*, 196.

Bhaskara Rao, K. P. S. See Bhaskara Rao, M.

Bhaskara Rao, M. and Bhaskara Rao, K. P. S. *A category analogue of the Hewitt-Savage zero-one law*, 497.

Bix, Michael C. *Z_2-equivariant immersions and embeddings up to cobordism*, 203.

Blair, William D. *An endomorphism ring which is not Ore*, 275.

Braun, Ben-Ami. *On the serial completion of deleted Schauder bases by a domain adjustment*, 427.

Buckley, J. J. *Graphs of measurable functions*, 78.

Bunce, John W. *Automorphisms and tensor products of algebras*, 93.

Calvert, Bruce. *Sets that remain maximal monotone under all monotone perturbations*, 318.

Chen, Bang-yen and Ogiue, Koichi. *Some implications of the Euler-Poincaré characteristic for complete intersection manifolds*, 1.

Clancey, Kevin F. and Morrel, Bernard B. *The essential spectrum of some Toeplitz operators*, 129.

Cohen, Fred and Connett, J. E. *A coincidence theorem related to the Borsuk-Ulam theorem*, 218.

Connell, Fred J. *Nonimmersions of low dimensional flag manifolds*, 474.

Connett, J. E. See Cohen, Fred.

Coonce, H. B. and Miller, S. S. *Distortion properties of p-fold symmetric alpha-starlike functions*, 336.

Cwikel, Michael. *On $(L^{p_0}(A_0), L^{p_1}(A_1))_{\theta,q}$*, 286.

Dai, Taen-Yu. *On a multiplication decomposition theorem in a Dedekind σ-complete partially ordered linear algebra*, 12.

Dales, H. G. *The ring of holomorphic functions on a Stein compact set as a unique factorization domain*, 88.

Davis, Burgess. *On the weak type (1, 1) inequality for conjugate functions*, 307.

Davis, Donald M. *The antiautomorphism of the Steenrod algebra*, 235.

Dotson, W. G., Jr. See Senter, H. F.

Edelstein, Michael. *Fixed point theorems in uniformly convex Banach spaces*, 369.

Felt, James E. *Homotopy groups of compact Hausdorff spaces with trivial shape*, 500.

Fisher, Joe W. and Snider, Robert L. *Prime von Neumann regular rings and primitive group algebras*, 244.

Fitzgibbon, W. E. *Nonlinear perturbation of m-accretive operators*, 359.

Gamlen, John L. B. *On a theorem of A. Pełczyński*, 283.

Gaudry, Garth I. and Inglis, Ian R. *Approximation of multipliers*, 381.

Gerlits, J. *On the depth of topological spaces*, 507.

Gilfeather, Frank. *A note on reductive operators*, 101.

Gilmer, Robert. *A two-dimensional non-Noetherian factorial ring*, 25.

Giroux, André. *Estimates for the imaginary parts of the zeros of a polynomial*, 61.

Graham, Colin C. *A Riesz product proof of the Wiener-Pitt theorem*, 312.

Grätzer, G. and Lakser, H. *Free-lattice-like sublattices of free products of lattices*, 43.

Hajek, Darrell W. *A note on Wallman extendible functions*, 505.

Hastings, Harold M. *On function spectra*, 186.
Heard, E. A. *Kahane's construction and the weak sequential completeness of L^1*, 96.
Hersh, Reuben. *Maximal coefficients are conditional probabilities*, 449.
Hewer, G. A. *A generalization of an inequality of Coppel*, 151
Hill, Paul and Megibben, Charles. *Extensions of torsion-complete groups*, 259.
Hulanicki, A. *On L_p-spectra of the laplacian on a Lie group with polynomial growth*, 482.
Inglis, Ian R. See Gaudry, Garth I.
Ishikawa, Shiro, *Fixed points by a new iteration method*, 147.
Jenkins, James A. *Some remarks on Weierstrass points*, 121.
Johnson, David Copeland. *An infinite complex and the spectral sequences for complex cobordism and K-theory*, 231.
Johnson, Gordon G. *An example in fixed point theory*, 511.
Johnson, Harold H. *An application of the maximum principle to the geometry of plane curves*, 432.
Johnson, Jerry A. *Extreme measurable selections*, 107.
Junghenn, Hugo D. and Taam, C. T. *Arcs defined by one-parameter semigroups of operators*, 113.
Kim, Paik Kee. PL *involutions on lens spaces and other* 3*-manifolds*, 467.
de Koninck, Jean-Marie. *Sums of quotients of additive functions*, 35.
Koutroufiotis, Dimitri. *Two characteristic properties of the sphere*, 176.
Kristiansen, G. K. *Proof of an inequality for trigonometric polynomials*, 49.
———. *Proof of a polynomial conjecture*, 58.
Kuhfittig, Peter K. F. *Fixed points of several classes of nonlinear mappings in Banach space*, 300.
Lakser, H. See Grätzer, G.
Langford, Eric. See Aliprantis, C. D.
Lappan, Peter. *An annular function which is the sum of two normal functions*, 403.
Lawson, Terry C. *Inertial h-cobordisms with finite cyclic fundamental group*, 492.
Lee, R. A. *Proving Kneser's theorem for finite groups by another e-transform*, 255.
Lee, Jong P. *Homotopy groups of the isotropy groups of annulus*, 213.
Lehman, B. *Products of arcwise connected spaces*, 221.
Loebl, Richard I. *Injective von Neumann algebras*, 46.
Lotz, Heinrich P. *A note on the sum of two closed lattice ideals*, 389.
McGehee, O. Carruth. *Fourier transforms and measure-preserving transformations*, 71
Maeda, Shûichirô. *Locally modular lattices and locally distributive lattices*, 237.
Megibben, Charles. See Hill, Paul.
Metzger, Thomas A. *On polynomial density in $A_\alpha(D)$*, 326.
Miller, S. S. See Coonce, H. B.
Minda, Carl David. *Conformally invariant metrics and prime ends*, 315.
Mishra, M. N. See Samal, G.
Moh, T. T. *On analytic irreducibility at ∞ of a pencil of curves*, 22.
Morrel, Bernard B. See Clancey, Kevin F.
Mott, Joe L. *Nonsplitting sequences of value groups*, 39.
Muenzenberger, T. B. and Smithson, R. E. *Refluent multifunctions on semitrees*, 189.
Naimpally, S. A. See Bentley, H. L.
Ogiue, Koichi, See Chen, Bang-yen.
O'Hara, P. J. and Rodriguez, R. S. *Some properties of self-inversive polynomials*, 331.
Ozols, V. *Clifford translations of symmetric spaces*, 169.
Palmer, T. W. *Arens multiplications and a characterization of W^*-algebras*, 81.
Palmquist, Paul H. *Adjoint functors induced by adjoint linear transformations*, 251.

Peterson, David R. *The excess of sets of complex exponentials*, 321.
Powell, James D. *Representations of locally convex *-algebras*, 341.
Rabindranathan, M. *On cyclic vectors of weighted shifts*, 293.
Rago, James Michael. *Convolutions of continuous measures and sums of an independent set*, 123.
Rajeswara Rao, K. V. *On the boundedness of p-integrable automorphic forms*, 278.
Rao, C. J. M. *On smallest compactifications for convergence spaces*, 225.
Richman, Fred. *Constructive aspects of Noetherian rings*, 436.
Ridenhour, Jerry R. *On (n, n)-zeros of solutions of linear differential equations of order $2n$*, 135.
Rinne, Robert L. *A universal space for G-actions in which a normal subgroup acts freely*, 208.
Rival, Ivan, *Maximal sublattices of finite distributive lattices*. II, 263.
Rodrigues, R. S. See O'Hara, P. J.
Rosenthal, Paul, *On the location of the singularities of the function generated by the Bergman operator of the second kind*, 157.
———. *A note on the singular points of the function generated by the Bergman operator of the second kind*, 163.
Samal, G. and Mishra, M. N. *On the upper bound of the number of real roots of a random algebraic equation with infinite variance*. II, 446.
Schwartzman, Sol. *Parallel vector fields and periodic orbits*, 167.
Senter, H. F. and Dotson, W. G., Jr. *Approximating fixed points of nonexpansive mappings*, 375.
Shore, Richard A. *Cohesive sets: Countable and uncountable*, 442.
Silvia, E. M. *On a subclass of spiral-like functions*, 411.
Singh, Prem. See Bajpai, P. L.
Smithson, R. E. See Muenzenberger, T. B.
Snider, Robert L. See Fisher, Joe W.
Stray, A. *Characterization of Mergelyan sets*, 347.
Stong, R. E. *Equivariant immersion and imbedding up to cobordism*, 479.
Sturgeon, Michael L. *The ergodic decomposition of conservative Baire measures*, 141.
Suryanarayana, D. *On $\Delta(x, n)=\varphi(x, n)-x\varphi(n)/n$*, 17.
Szeto, George. *Planar and strongly uniform near-rings*, 269.
Taam, C. T. See Junghenn, Hugo D.
Thomason, R. W. *A note on spaces with normal product with some compact space*, 509.
Waid, Carter. *On Dirichlet's theorem and infinite primes*, 9.
Watkins, William. *Convex matrix functions*, 31.
Wheeler, E. R. *Localizing equivariant bordism*, 485.
White, H. E., Jr. *The approximation of one-one measurable transformations by measure preserving homeomorphisms*, 391.
———. *Topological spaces in which Blumberg's theorem holds*, 454.
———. *Two unrelated results involving Baire spaces*, 463.
Wilkins, J. Ernest, Jr. *The Silverman necessary condition for multiple integrals in the calculus of variations*, 409.
Winston, Elliot. *Asymptotic stability for some critical autonomous differential equations*, 385.
Wong, James S. W. *A note on subadditive functions*, 106.
Young, Wo-Sang. *On the a.e. convergence of Walsh-Kaczmarz-Fourier series*, 353.
Zame, William R. *Relative size of the Shilov boundary of a function algebra*, 68.
Zinn, Joel. *Zero-one laws for non-Gaussian measures*, 179.
